

# SOMNOtouch™ RESP eco

## LESS IS MORE... EFFICIENT & POWERFUL SCREENER

### Proven Signal Quality\*

Based on SOMNOtouch™ RESP - with flow/CPAP pressure/snore, SpO<sub>2</sub>, pulse rate, plethysmogram, activity, effort, battery voltage, position and patient marker

### Easy Handling

Easy to apply, pre-programmed or manual start which can run for up to 18h

### Simple to Use

Pre-loaded montage and sleep report. Software with powerful tools for fast manual scoring

### Outstanding Cost/Benefit Ratio

Be competitive whilst utilising the best respiratory sleep screener device - from the thought leaders in sleep diagnostics

### Small Compact Design

Same footprint as a credit card, with built-in Li-ion battery, allowing unparalleled comfort for the patient and ease of use for the clinic

The **SOMNOtouch™ RESP eco\*** – joins the SOMNOtouch™ family of products and is positioned primarily at the physician who only requires a simple screening device.

Responding to the growing demand for low cost home sleep devices (HST) – the SOMNOtouch™ RESP eco epitomises the term “less is more” - with 11 channels not including one optional sensor: abdomen effort. Using intelligent connect™ and a combined data and charging USB cable it is exceptionally easy to set up and use.

\*FDA cleared for adults only

**STAY CURRENT WITH FREE AUTOMATIC SOFTWARE UPDATES**

## Diagnose better with SOMNOtouch™ RESP eco

- ◆ Correlation between body position and respiratory events – to better differentiate between patients requiring positional training devices or CPAP therapy
- ◆ Cheyne Stokes analysis in combination with pulse rate, gives insight to cardiorespiratory health
- ◆ Computer aided arousal detection on the plethysmogram enables you to score RERA's and define sleep fragmentation
- ◆ Distinguish between AHI and RDI using the RERA's
- ◆ Extensive CPAP pressure report – better define the ideal fixed pressure for your patients

## Simple easy to use interface

- ◆ Easy to use for both physician and patient
- ◆ Quick start function – one standard montage
- ◆ Pre-configured report for helpful data processing
- ◆ Marker button to notify of interesting events

## No thermistor needed

Measure mouth breathers with a nasal-oral cannula. Then process the signal with our linearization algorithm for results that have the same sensitivity and specificity as a traditional thermistor<sup>1</sup>.

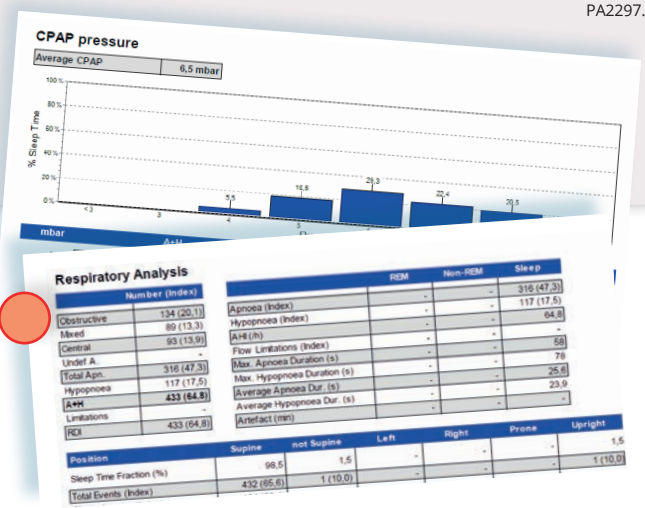

<sup>1</sup>Diagnostic utility of a nasal-oral cannula with linearized pressure flow in comparison to AASM recommended combination of thermal and nasal pressure sensor.

Küchler, G. et al., Eur Respir J 09.2017, 50 (suppl 61) PA2297; DOI: 10.1183/1393003.congress-2017.PA2297.

## Device & analysis software

- ◆ 50min fast charge for an 8h night recording
- ◆ Quick data transfer (Approx. 90s for a full nights study)
- ◆ PC interface with graphical based control
- ◆ Powerful software based on existing DOMINO light software platform
- ◆ Manual & computer aided scoring available
