

SLEEP DIAGNOSTICS FOR CHILDREN? AS EASY AS 1, 2, 3.....

PEDIATRICS

SOMNOtouch™ RESP

SOMNOmedics is a global leader in pediatric sleep diagnostics, with some of the smallest devices offering a wide range of child specific sensors, as well as an home video option, it's easy to see why we are the preferred choice.

- * One of the smallest pediatric sleep diagnostic devices on the market
- * Ambulatory or lab-based
- * Parent friendly 'timed auto-start' and camera set-up – allowing the PSG to take place in the home of the child
- * Specific neonate templates in our Domino analysis software
- * Telemetric data transfer whilst data is also stored automatically on an SD card - allowing full mobility of the child
- * The device can be worn by the child as of the first month of life
- * Many built in sensors – less cables – meaning higher comfort for the child & care giver
- * A large range of pediatric sensors available

SOMNOmedics pediatric products

...because even astronauts and princesses need a good night's sleep

One of the smallest PG & PSG devices available

- Our SOMNOtouch™ RESP is only 84 x 55 x 18 mm and 64 g
- Internal Li-Ion battery with smart battery management system
- Automatic sensor recognition
- Mobile signal check for home screening applications

Offline video for the ultimate home PSG test

- Less stress for the child if they sleep in their own bed
- Sync. video with the study results via our diagnostic software (system time based)
- Infrared illumination – allowing Sleep Lab standards at home

Tiny patients benefit from SOMNOmedics™ RESP: Our *tiniest* sleep diagnostic device

PEDIATRIC SENSORS

Fingerclip
Soft Wrap
Nasal cannula
Inductive effort belts (RIP)
Effort belts for internal effort
1-channel ECG sensor & more...

MOBILE CHECK

Save time and money by getting a screen shot of the recording for a signal check to your PC, Tablet or Smartphone – ideal for ambulatory applications to ensure the study is running smoothly.

Integration of external signals

- CO₂ monitor (transcutaneous) integration
- Easy to record extra diagnostic parameters: Our devices can record up to 16 additional external signals via our range of 'optocouplers'
- True sound recorded with the Home Sleep Camera

Video camera (optional extra)

A TCM5 FLEX transcutaneous tcpCO₂ monitor can be added via our optocoupler

DOMINO Software Features

- Specific analysis templates for children
- Create a generic channel for 'Undefined Apnoea' & 'Periodic breathing' events and define the keys for scoring
- The patient does not tolerate the thermistor and nasal cannula? Then use the 'sum effort' as breathing source
